Education

Indian Institute of Technology (ISM) Dhanbad
Bachelor of Technology in Mechanical Engineering

Aug 2020 – May 2024
GPA: 7.62/10

Experience

Standard Force Corporation

Oct 2024 – Present

Software Developer and System Engineer (Japan, On-site)

- Architected a distributed **ETL pipeline** consolidating 4 remote MySQL databases into a centralized warehouse via SSH2 tunneling and cron-based batch sync; managed end-to-end **CI/CD** with Docker and Git across AlmaLinux servers, cutting deployment time by 60%.
- Built an **AI Document Assistant** supporting PDF, Office, image, Excel and audio uploads with natural language querying; implemented end-to-end RAG stack with Gemini Vision, Tesseract OCR, pgvector search, pg-boss workers, and SSE-streamed token output via LangChain.
- Delivered an enterprise **Construction Management System** with real-time budget alerts, financial tracking, and compliance monitoring across 5 client organizations on AlmaLinux with zero-downtime rollouts.
- Built a **Next.js dashboard** with virtualized tables, Recharts/Tremor visualizations, drag-and-drop layout, fuzzy search, Redis caching (40% load reduction), Excel export pipelines, and a **QR Code Management System** with real-time logistics tracking.

Life Team United (LTU Corporation)

May 2023 – Sep 2024

Full Stack Developer Intern (Omura, Nagasaki, Japan)

- Designed and deployed a full-stack **supply chain dashboard** (ReactJS, NodeJS, MySQL) serving 3 internal teams; integrated Nivo and Wijmo chart libraries into an existing **Laravel** project over secure SSH tunneling, reducing manual reporting time by 50%.

Urban Reach & Fynii

Jun 2022 – Jan 2023

Frontend Developer Intern (India, Remote)

- Engineered a responsive **ReactJS Sales Management System** for 200+ users; developed tutor selection and matching modules for Fynii's EduTech platform, supporting 500+ student and tutor pairings.

Projects

Automated Online Classroom Platform

2022

ReactJS, NodeJS, Python, WebRTC, Socket.io, ML

- Built a multi-user video platform with real-time chat, automated attendance, speech transcription, and ML-based attention detection for 50+ concurrent users; recognized as **Top 5 at HACKFEST 2022**, IIT(ISM) Dhanbad.

Skills

Languages: JavaScript, C++, SQL, Python

Frontend: ReactJS, NextJS, HTML, CSS, Recharts, Tremor, Nivo, Browser APIs

Backend: NodeJS, ExpressJS, REST APIs, SSH2, WebSockets, Streams, Clusters

Databases & Cache: MySQL, PostgreSQL, Redis, pgvector, pg-boss, ETL Pipelines, Query Optimization

AI & LLM: MCP Server, LLM Integration, RAG, Gemini API, LangChain, Document Intelligence

DevOps & Cloud: AlmaLinux, CentOS, Git, CI/CD, Server Management, Sakura Internet

Awards & Achievements

Top 5, HACKFEST 2022 at IIT(ISM) Dhanbad · Automated Online Classroom with ML-based attention detection

1st Runner-Up, Web-It-Up Competition · Binary Bombers team project

1st Runner-Up, Ideate Competition · Off-Earth Mining concept

Solved 1500+ DSA problems across platforms · Global Rank **511** CodeChef Starters 27 · Rank **1571** AtCoder Regular 141 · Rank **605** Newton Coding Challenge
